

Training for Industry

The STA provides independent and impartial training to meet the needs of the members on a variety of topics related to emission monitoring.

BS EN 14181—Stationary source emissions - Quality assurance of automated measuring systems (AMS) (CEM systems) is one of the most significant and demanding standards to be developed by CEN and it has far reaching consequences for Regulators, Equipment Manufactures, Test Houses and most importantly - Process Operators.

For the implementation of the standard the Agency has developed a Method Implementation Document (MID) and a Technical Guidance Note. The purpose of the training is to provide guidance in the application of the various parts of the standard.

Start time: 9.30am for 10.00am

Finish time: approx 4.30pm

Sandwiches provided at lunch;
please inform us of any dietary
requirements before hand
