

Training for Industry

On-Site Auditing

The STA provides independent and impartial training to meet the needs of the members on a variety of topics related to emission monitoring.

A requirement of the OMA scheme is for process operators to carry out periodic auditing of stack-emission monitoring. On-site auditing refers specifically to checking that the personnel carrying out monitoring do so in accordance with the agreed site-specific protocol (SSP) and documented procedures. The aim of this one day training course is to provide a basic understanding of stack-emission monitoring to enable process operators, regulators and environmental consultants to audit stack sampling contractors.

Start time: 9.30am for 10.00am

Finish time: approx 4.30pm

Sandwiches provided at lunch; please inform us of any dietary requirements before hand
All you need to bring is yourself!

Location: STA Offices,
Unit 11 Theobald
Business Centre,
Knowl Piece, Wilbury
Way,
Hitchin, Herts
SG4 0TY.
