

Training for Industry

The STA provides independent and impartial training on a variety of topics related to emissions monitoring.

The STA has developed a series of revision training courses based on the syllabuses for the MCERTS personnel competency standard. The courses are one day duration, and are held at the STA's Hitchin office starting at 10.00 and finishing at approximately 16.00.

The revision courses are designed to highlight the depth of knowledge required to succeed in the examinations. Current courses include:

Technical Endorsement (TE) 4 Gases/vapours by instrumental techniques

Course content:

- TE4.1 Instrumental sampling systems
- TE4.2 Converting results to standard conditions
- TE4.3 Converting ppm results to mg.m^{-3} and calculating mass emission rates
- TE4.4 Uncertainty budgets
- TE4.5 Describing a real example
- TE4.6 Sampling strategy

Courses are run for a minimum of 5 delegates with a maximum of 10 delegates. The duration of each course is one day.

Who should attend

Revision courses are aimed at experienced stack emissions monitoring personnel who intend to apply for certification or recertification.

The Cost

For prices go to the STA website or use the link: <http://www.s-t-a.org/training>

The STA is a non-profit making organisation, therefore all courses are run at cost for members.

Training course dates and fees are available from <http://www.s-t-a.org/training>

COURSES CAN BE HELD AT YOUR SITE contact the STA for details.
