

# Training for Industry

## On-Site Auditing

The STA provides independent and impartial training to meet the needs of the members on a variety of topics related to emission monitoring.

A requirement of the OMA scheme is for process operators to carry out periodic auditing of stack-emission monitoring. On-site auditing refers specifically to checking that the personnel carrying out monitoring do so in accordance with the agreed site-specific protocol (SSP) and documented procedures. The aim of this one day training course is to provide a basic understanding of stack-emission monitoring to enable process operators, regulators and environmental consultants to audit stack sampling contractors.

### Course Content

- ◆ Ethical requirements for independence and environmental awareness
- ◆ Use of MCERTS certified personnel
- ◆ Selection of appropriate methods following international standards
- ◆ Method Implementation Documents
- ◆ Estimation of measurement uncertainty
- ◆ Use of appropriate equipment
- ◆ Description of standard reference methods
- ◆ Planning of a sampling measurement campaign: site review; risk assessment; site-specific protocol
- ◆ Reporting of results
- ◆ Participation in proficiency-testing schemes.

**Course duration**            One day starting at 10.00 am

This course is aimed primarily at process operators, regulators and environmental consultants.

For prices go to the STA website or use the link : <http://www.s-t-a.org/training>  
Course number ON-1
