

Training for Industry

The STA provides independent and impartial training to meet the needs of the members on a variety of topics related to emission monitoring.

The STA has been running this course for over 10 years and is based on the freely available STA guidance document "Risk Assessment Guide—Industrial-emission monitoring" which has become the industry standard and reference in the Environment Agency Technical Guidance note M1.

The one day course covers parts of the legislation in relation to emission monitoring including;

- Electricity at Work Regulations 1989
- Personal Protective Equipment at Work Regulations 1992
- Workplace (Health, Safety and Welfare) Regulations 1992
- The Carriage of Dangerous Goods and Use of Transportable Pressure Receptacles Regulations, 2004
- The Lifting Operations and Lifting Equipment Regulations 1998 (LOLER)
- Control of Substances Hazardous to Health Regulations 1999 (COSHH)
- Management of Health and Safety at Work Regulations 1999
- Noise at Work Regulations 1989
- Construction Health and Welfare Regulations 1996
- Manual Handling Operations Regulations 1998
- Confined Spaces Regulations 1999
- Work at Height Regulations 2005.

Course Content

- Risk Assessment Procedure
- Hazard Identification
- Risk Control Measures
- Work at Height Regulations
- Platform Inspections

Who should attend

This course will be of interest to anyone involved in the planning, organising or carrying out emission monitoring activities.

It is a requirement for personnel certified to the MCERTS performance standard for personnel that they attend a recognised course.

As the STA is a non-profit making organisation and therefore all courses are run at cost to the membership.

Costs of training courses are available from <http://www.s-t-a.org/training>

COURSES CAN BE HELD ON-SITE contact Samatha for details.
