

Training for Industry

The STA provides independent and impartial training to meet the needs of the members on a variety of topics related to emission monitoring.

The STA has developed a series of revision training courses based on the syllabuses for the MCERTS personnel competency standard.

The revision courses are designed to highlight the depth of knowledge the candidates are required to know to enter for the examinations.

TE 1 Particulate measurement

Course Content

Standards review

TE1.1 Sample train components

TE1.2 Sample location

TE1.3 Preliminary work and quality control

TE1.4 Calculating stack gas volumetric flow rates

TE1.5 Calculating flow rates in a sample train

TE1.6 Units and reference conditions

Courses are held online from 9.30am via Microsoft Teams. Duration of each course is one day.

Who should attend

These revision courses are aimed primarily at experienced personnel involved in stack emission monitoring who are planning on applying for certification or recertification.

As the STA is a non-profit making organisation and therefore all courses are run at cost to the membership. Costs and dates of training courses are available from <http://www.s-t-a.org/training>.
